

## CLAIMS

What is claimed is:

1. An improved GPS device, having a radio portion that communicates with a plurality of satellites for determining a location of the device, the improvement comprising:  
a capability for triggering multiple warnings at different locations, including a first trigger that activates an alarm on a nearby motor vehicle; and  
a second trigger that transmits the location to a recipient at a distant location that communicates with a ground dispatch station.
2. The device of claim 1, further comprising a connector for attachment of a key.
3. The device of claim 1, wherein the alarm is part of a security system of the motor vehicle.
4. The key holder of claim 3, further comprising a switch for activating the security system.
5. The key holder of claim 3, further comprising a switch for de-activating the security system.
6. The device of claim 1, wherein the first and second triggers comprise the same physical trigger.
7. The device of claim 1, further comprising a speaker that emits a sound triggered by operation of at least one of the first and second triggers.
